50X1-HUM

The struggle of the Inmingun, necessitated by a just cause, will lead to total victory, while the aggressive intervention by the American warmongers, motivated by vicious intentions, is destined to total defeat. The aggressors' armed intervention served only to stir up the indignation of the people of Korea. Beginning with the students of the Kim Il-song University, students in colleges and universities throughout the northern half of the People's Republic, as well as youths in factories and on farms even in the most remote regions, are begging to join our fighting forces at the front, ready to sacrifice their lives for the unification and sovereign independence of our fatherland. The number of such youths has exceeded 110,000 as of 2 July.

Lately, the democratic power of the people of Korea has been mobilized to the full extent toward the single objective of destroying the vicious civil war instigator, Rhee. Lately, the American warmongers have become the object of intense hatred by all peace-loving peoples of the world, for the American imperialists are the enemies of progressive civilization. The brave actions of the Inmingun, acting in the sacred mission of destroying the American aggressors and the vicious capitalistic tool, Rhee, have received enthusiastic applause and whole-hearted support from all peace-loving democratic peoples of the world.

We urged the American imperialists to recall the fate of the Fascists. All Fascist groups which recklessly challenged the power of the USSR met the same humiliating defeat as that of Hitler, who was the trouble maker and the most vicious of all, when they faced the solidly united power of the Soviet people and the heroic fighting strength of the Soviet Army.

Similarly, the American imperialists, who are the instigators of the present aggression, will come face to face with the united strength of the democratic peoples of the world and the determined challenge of the peace-loving peoples of the world, if they stir up the hostile feeling of these progressive peoples. This irrefutable fact will inevitably lead the American imperialists to the same fate the Fascists met.

The uselessness of armed intervention by the American imperialists has been already demonstrated in China, where they met determined resistance by the people of that country, which led to the total failure of intervention.

The American imperialists supplied the Nationalist Army of the reactionary, Chiang Kai-shek, with arms amounting to 6 billion dollars, and trained, under direct supervision of the US Army, several score divisions of the Nationalist Army. The US air forces bombed the Chinese Liberation Army and the people unscrupulously. In spite of all these aggressive efforts, the American armed intervention failed completely in the face of formidable resistance by the people of China and the Chinese Liberation Army. The reactionary Nationalist Army was chased off the Chinese mainland, and the people established the People's Republic of China.

It is a foregone conclusion that, should the American imperialists try another mischievous scheme in the Far East in their inordinate desire to secure control of the Far East, they will be directly confronted with stubborn resistance from the peoples of the Far East and the world at large, which inevitably leads such schemes to complete failure. The American imperialists cannot thwart our fervent desire to attain total unification and sovereign independence of the people and the fatherland of Korea. The Korean people are determined to win their righteous struggle.

Fighting forces of the People's Republic! Fight most stubbornly against the armed intervention of the American imperialists. Be watchful of the underhand designs plotted by the enemy, and stir up your animosity toward the enemy ever more. Show heroism and bravery in your war of justice against the traitorous Syngman Rhee and his henchmen who work as the tools of the American imperialists. These traitors you must destroy. Long live the Democratic People's Republic of Korea which besieges and destroys the aggressors for the benefit of the people of Korea!
